

ESSKAY

Group of Companies

esskayind@yahoo.com
www.esskayind.com

The foundation Of Esskay group was laid in 1978. Since then, the company has successfully crossed many milestones and established itself firmly in the landscape of quarry and crushing business Kerala. After 40 years of successful growth we have now 6 units spread over Kerala in strategic locations where the fast infrastructural developments are happening. The present capacity of our units are 15000T of products per day. The groups Head office is Located at Perumbavoor, Ernakulum District.

The quarrying and crushing operations are carried out in conformation to the approved industry standards.

We steadfastly adhere to the safety guidelines of Directorate General of Mines Safety (DGMS), India and have made elaborate and meticulous top notch safety provisions for safeguarding our workmen and machinery The fully mechanized operations are underpinned by adequate technological interventions needed for smooth 3 stage operational process.

Our Founders and Managing Board

At the helm of affairs of The Esskay group are Mr.Mathew M Pathrose and Mr.Varghese P Thankachan are in the capacity of Managing Partner. A team of other partners, who has been actively involved with the activities of the group since its inception, assists and advises the board proficiently.

Mission

We are driven by the goal of bestowing on our clients cost competitiveness in all their relevant business pursuits by providing industry grade aggregates and other crushed products optimally within the strategic timeline.

Our mission gets abundantly reflected from our motto,

"Making the Nation pride by providing best quality with competitive rates aggregates and prompt delivery according to the customer need"

Vision

We visualize evolving as the frontline crushed stone product/ aggregate/M-sand supplier that can efficiently meet the contemporary demand of the market and work progressively towards making our state and nation self-sufficient in terms of processed quarry and crushed products.

Objectives of our Project

We have embarked on the quarrying and crushing project with the intention of fulfilling the needs of aggregates/ M-sand/ processed stone outputs for the construction, PWD, Railway, High ways and National high ways and Airport ventures through adoption of proven, advanced, contemporary and improved technology. We will always adhere to the deadlines committed to our clients and would keep our costs reasonable. We intend to accomplish optimal satisfaction on the parts of our esteemed clients.

Our passion for top notch professionalism would reflect from all our interactions.

Quarry Divisions

To sustain unhindered supply of processed quarry products to our clients, we have acquired a sprawling quarry complex in various parts of Kerala. The stone quarry has vast reserves of granite. The bulk of our regular stone requirement is sourced from this stone pit. Significant investment has been done to bring up the quarry operations at par with international quarrying counterparts. Each nook and corner of the pit is accessible by wide roads which further augment our productivity. We are engaged in continuous upgrading of the quarrying facilities to harness the true potential of our valuable asset.

We have embraced cutting edge techniques to streamline the mining operations. Contemporary and advanced equipment as well as technologies are in place within the pit to conduct operations in tandem with global benchmarks. We pride ourselves for being able to fulfil demand of any scale for crushed products without experiencing any problems and within committed deadlines. We have the infrastructure, resource base, wherewithal, cutting edge technology, skilled manpower, transit provisions and latest facilities to conduct quarrying on large scale and meet all instantaneous and wholesale processed product demands.

The Group has entered into business during 1978 with the **Concrete Aggregates** industries Ernakulam which has a capacity of 200 tons of products per hour. The first 4way high way Cherthala – Aroor for which the entire material was supplied by us from this quarry.

We have added our next unit **Granite India** at Valanchery, Malappuram district which has a capacity of 100 tons per hour.

Esskay Industries and Blue Mountain Granites has started at Thrissur district with the capacity of 200 tons per hour each.

Our another unit at Kannur, **New Bharath Stone Crusher** having capacity of 300 tons per hour which is presently taking care of the need of Kannur airport and national high way works other than the normal local needs. This unit is equipped with state of the art Sandvik CJ 411 Primary Jaw Crusher, Secondary Jaw Crusher, Sandvik Cone crusher, VSI and Classifiers for M-sand and plastering sand separately.

The group has finalized all required license from various departments and authorities to start the most modern unit at Palakkad district which will have a capacity of 300 tons per hour.

Our Technological Strides

Our crusher plants is equipped with state of the art Sandvik CJ 411 Primary Jaw Crusher, Secondary Jaw Crusher, Sandvik Cone crusher, VSI and Classifiers for M-sand. Comprehensive safety mechanisms are in place at the crusher to prevent any deviation from the manufacturer recommended machinery operation and to steer clear of any untoward incident.

We have deployed the entire array of state of the art material handling technologies in our stone crushing plant to facilitate seamless movement of stones from one equipment to other all through the process, right from raw material unloading up to stockpiling of finished products. Our crushing paraphernalia is constituted of feeders, apron feeders, belt feeders, vibratory feeders, conveyors, apron conveyors, belt conveyors and bucket elevators. We have a dedicated maintenance team comprising of experienced mechanical and electrical engineering professionals who chalk out and implement scheduled, preventive and condition based monitoring at pre-defined intervals.

Safety and Environmental Consciousness

Government of Kerala has accorded our quarry the legal license to operate. We have acquired 'Environmental Clearance' from Ministry of Environment and Forest (MoEF) as well as Pollution Control Board, Mining and Geology, Mines Safety, Explosives

In our quarry, we have special arrangements to suppress dust from getting airborne. Water sprinkling provision, utilization of surface water for controlling fugitive dust, and tapping of mist and spring waters for maintaining adequate water reserves for spraying reflect our strong desire to curb noxious dust.

We have secured explosives magazine license from PESO (Petroleum and Safety Organization) to conduct hazard free blasting. Blasting is conducted in observance of the norms stipulated by Mines Act 1952, Mine Regulations 2014 and Kerala Minor Minerals Concessions Rules 2015. To control the propagation of blast induced ground vibration to inhabited areas in close proximity to the quarry as well as to prevent instances of fly rocks, we have instituted robust 'Muffle Blasting System'. Team of experts from NITK, Surathkal was engaged to conduct comprehensive ground vibration study and to certify the efficiency of our endeavours for controlling vibration.

Within the ambit of our quarrying and crushing operations, we conduct Ambient Noise, Air and Water pollution tests twice in a year by accredited third party. Our Environmental Cell has been constituted to exhibited unwavering compliance to the norms of MoEF.

We are committed to undertake every step to reduce the exposure of our employees to safety hazards. Each of our workmen has been provided with necessary PPE (Personal Protective Equip-ment) such as fluorescent jackets, ear muff, nose filter, safety goggles, hand gloves, safety shoes etc. to reduce vulnerability to any unsafe condition. Regular safety audits are conducted to ensure the integrity of the adopted safe practices.

The approval to operate HEMM (Heavy Earth Moving Machinery) has been sought from DGMS. We have the sanctioned strength of qualified technical personnel as per the requirement of DGMS. The capacities of our HEMM and haul trucks are in line with the quantum and quality of quarry and final products to be supplied by us as per our annual operating plan's projections.

We have showcased our desire to fulfil the aspirations of each and every stakeholder and as such have acquired the permission of local village council for operating quarry.

We have conducted all prescribed tests for Aggregates and M-Sand from Civil Aid, Bangalore. Hygienic, well-appointed and salutary residential quarters have been provided to our workers at two places close to the quarry. We have made provisions for potable drinking water, electricity and other civic amenities to ensure optimum productivity.

We regularly engage in CSR (Corporate Social Responsibility) activities to promote the welfare of the society for which we operate. A portion of our operational expenses annually is earmarked for driving CSR initiatives in the area. We believe that significant part of the profits accruing from any professional venture should be diverted towards accomplishing the nobler objectives of the human society i.e. promote the welfare of the deprived communities in whose vicinity we operate. Collective growth is our CSR motto.

Mine Planning

Our Mine planning and operation segment is manned by qualified and experienced mining engineers. We also engage mining consultants periodically to give definitive direction to our short and long term plans. The technical team for mine planning is headed by Mines Manager with sufficient years of relevant Indian and international mining experience under his belt. A visionary, he possesses comprehensive knowledge of the most contemporary of technical strides in the mining industry and pegs the production target by factoring in all attributes conducive to safe and smooth operations.

Our Corporate Social Responsibility

With a strong belief that we should serve the society of which we are a part to the best of our capabilities to, we have initiated various gestures of compassion. The venture has always shown justice towards its obligation to mankind. We have immensely supported road development in areas near us by providing basic infrastructure. To the financially downtrodden, we aid in home renovation and even in building new homes. Besides, we also fund medical camps and other charity activities including donations to the economically grieving communities nearby.

Products

We provide expert quality checking on all our products. We never compromise the quality which we deliver to you and Supply Material according to customer need.
